

## SHEAR WRENCHES

Specially developed for Torque Tightening and Tearing of special bolts, which do not need a torque setting. The tool will tear the tail end of bolt after achieving the torque. This tool is widely used for tension control bolts in structural steel erection.

The tool works with an electric connection of 230 volt 50/60Hz. max. input power 1200W.

Model No.	Max. Torque (Nm)	Bolt Size	Free Speed RPM	Approx. Weight (Kgs.)
GTT 1216	290	M12, M16	29	3.7
GTT 2022	725	M16, M20, M22	14	4.8
GTT 2224	950	M22, M24	10	6.2
GTT 2730	1900	M27, M30	5	6.7
